1st Session

SENATE

REPORT
102-147

MILITARY CONSTRUCTION APPROPRIATION BILL, 1992

SEPTEMBER 12 (legislative day, SEPTEMBER 10), 1991.—Ordered to be printed

Mr. SASSER, from the Committee on Appropriations, submitted the following

REPORT

[To accompany H.R. 2426]

The Committee on Appropriations, to which was referred the bill (H.R. 2426) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1992, and for other purposes, reports the same to the Senate with various amendments, and presents herewith information relative to the changes made:

Amount of bill passed by House	$8,483,006,000
Amount of Senate bill under the House	69,261,000
Total of bill as reported to Senate	8,413,745,000
Amount of 1992 budget estimate	8,563,030,000
Amount of 1991 appropriations	8,362,171,000
The bill as reported to the Senate:	
Under the budget estimate, 1992	149,285,000
Over appropriations for fiscal year 1991	51,574,000

BACKGROUND

Purpose of the Bill

The Military Construction appropriation bill provides necessary funding for the planning, design, construction, alteration, and improvement of military facilities worldwide, both for Active and Reserve Forces. It also finances the construction, alteration, improvement, operation, and maintenance of military family housing, including payments against past housing mortgage indebtedness. Certain types of community impact assistance may be provided, as well as assistance to members of the military who face loss on the sale of private residences due to installation realignments. The bill is also the source for the U.S. share of NATO infrastructure construction costs. In addition, the bill provides funding to implement base closures and realignments authorized by law.

Comparative Statement

The fiscal year 1992 budget requests appropriations totaling $8,563,030,000. The following table displays this request and compares it with the current fiscal year, the House amount, and the Committee recommendation:

[1] Fiscal year 1992 estimates include $18,870,000 requested under the defense business operations fund.
[2] Fiscal year 1992 estimates include $221,620,000 requested under the defense business operations fund.
[3] Fiscal year 1992 estimates include $25,640,000 requested under the defense business operations fund.
[4] Fiscal year 1992 estimates include $154,100,000 requested under the defense business operations fund.

SUMMARY OF THE BILL

The Committee recommends a total of $8,413,745,000 in new budget authority/appropriations for fiscal year 1992 programs under its jurisdiction. Significant comparisons are noted below:

Fiscal year 1992 budget request: Budget authority	$8,563,030,000
Committee recommendation for fiscal year 1992: Budget authority	8,413,745,000
Which is—	
Over the appropriation for fiscal year 1991 by	51,574,000
Under the budget request by	149,285,000
Under the House appropriation by	69,261,000

The Committee has approved rescissions totaling $189,792,000. The House approved the same rescissions. The amount of rescissions enacted in fiscal year 1991 was $312,419,000. Excluding the effect of rescissions, new fiscal year 1992 appropriations are $71,178,000 below the fiscal year 1991 level.

COMPLIANCE WITH SECTION 308 OF THE BUDGET CONTROL ACT

Section 308(a) of the Budget and Impoundment Control Act of 1974 (Public Law 93-344) requires that the Committee include in its report a comparison of its recommendations with levels contained in the first concurrent resolution. Appropriate data are reflected below:

BUDGETARY IMPACT OF BILL

[2] Excludes outlays from prior-year budget authority.

NA: Not applicable.

COMMITTEE RECOMMENDATION

As previously noted, the Committee is recommending new fiscal year 1992 appropriations of $8,413,745,000. This is $149,285,000

under the budget request, $69,261,000 under House appropriations, and $71,178,000 under the adjusted appropriations for fiscal year 1991. The Committee is also recommending certain rescissions of prior year budget authority. The basis for this recommendation is contained in the following "Items of special interest," and under the discussions pertaining to each individual appropriation. Complete project detail is provided in the tables at the end of the report.

ITEMS OF SPECIAL INTEREST

CONFORMANCE WITH AUTHORIZATION BILL

The Committee strongly supports the authorization-appropriation process. The Committee has provided construction funds for projects which were included in the Senate-passed version of the National Defense Authorization Act for fiscal year 1992. The Committee has approved no unauthorized projects. As in previous years, the Committee has provided deficiency allowances in selected accounts to permit House-Senate conference consideration of projects expected to be authorized in the final version of the National Defense Authorization Act.

BASIS FOR COMMITTEE RECOMMENDATION

National defense requirements are changing. Force structure is being reduced 25 percent. Dozens of military installations inside the United States and overseas are being closed. This period of retrenchment requires that the Committee provide funds only for the highest priority military construction requirements. The Committee is also rescinding funds from prior years which should not be spent because of force and base structure uncertainties.

FUTURE MILITARY CONSTRUCTION INVESTMENTS

The Committee has made substantial reductions from the budget request submitted by the Department of Defense. These reductions are offset, in part, by the addition of higher priority projects, particularly for Guard and Reserve investments. For several years, the Congress has steadily reduced overall military construction expenditures. Military construction accounts funded in this bill are 31 percent below the fiscal year 1985 level, adjusted for inflation. Additional real reductions will be made in future years as forces and bases contract.

The military services must be good stewards with the amount of funding provided. The Committee will not condone a deterioration of the military workplace or community and family facilities. Our greatest military resource is the men and women of our Armed Forces and their families. The military services must continue to ensure that quality facilities are provided to the Nation's military volunteers and their families. However, budget realities will continue to limit available funding. Therefore, future military construction investments must be requested on a priority basis. Lower priority projects which crowd out high priority quality of life projects will not be supported by the Committee.

PROPOSED PROGRAM PAUSE

The 2-year budget submitted by the Department would result in a pause in military construction investments in fiscal year 1993, if approved by Congress. As in previous years, the Committee has not taken action on the second year of the Department's 2-year budget. However, the Committee believes a pause would not result in the effective management of resources. A military construction pause would result in priority projects being postponed, an unnecessary deterioration of base infrastructure, and an increase in base operations and maintenance costs. Therefore, the Committee urges the Department to submit an amended budget for fiscal year 1993 within the 050 budget caps previously approved by Congress.

NEED FOR CONTINUED OVERSIGHT

The Committee seeks to maintain appropriate oversight in military construction programs. The Committee has turned down the Department's request to include $422,000,000 for construction projects under the proposed Defense Business Operations Fund [DBOF]. If approved, this Department initiative would eliminate from the jurisdiction of the Subcommittee on Military Construction more than 10 percent of total military construction investment funding. In addition, the Committee understands that the Department is considering another initiative which would shift more than $3,000,000,000 from the "Family housing operations" accounts into another revolving fund. The Committee opposes reforms which reduce legitimate congressional oversight and which grant broad latitude to the bureaucracy in the Department of Defense. The Committee will continue to work with the Department to reduce paperwork requirements and so-called congressional micromanagement. In the past several years, the Committee has substantially reduced the number of required reports and has altered reporting thresholds to reduce the workload of the Department. However, the Committee will always insist on effective oversight for major military construction projects and family housing activities.

UNREALISTIC BUDGET REQUEST

The Department continues to submit unrealistic budget requests for military construction activities. From the fiscal year 1991 level, the request seeks a 178-percent increase for project construction at locations overseas. In addition, funding for the NATO infrastructure program is requested to increase 85 percent. Funding for Air Force military construction is increased 33 percent; Air Force family housing, 18 percent; and Army construction, 26 percent. The budget slashes the cost-effective Guard and Reserve component and the Navy construction program to make room for requested project increases of the other components. The Guard and Reserve is cut 66 percent; the Navy, 40 percent. The Committee regrets the Department continues to submit unbalanced programs. The Committee has shifted resources in order to present to the Congress a more balanced program in line with national priorities.

GUARD AND RESERVE

The Committee continues to support increased funding for the Guard and Reserve. The Committee believes the Guard and Reserve is the most cost-effective component of the Department of Defense. The Committee urges DOD to place more emphasis on the Guard and Reserve as the active services are built down. Therefore, the Committee has increased funding for Guard and Reserve accounts by $381,303,000.

OVERSEAS CONSTRUCTION

The Committee recommends a moratorium on most overseas construction projects. Therefore, more than $250,000,000 has been eliminated from the request. The Department has not provided the Committee with a specific overseas base structure plan. The Committee believes that many more overseas bases should be closed. Until a list of overseas closures is finalized, the Committee believes military construction overseas should be approved only on an exception basis.

CROTONE AB, ITALY

The Committee has included a legislative provision denying the use of funds appropriated for the "NATO infrastructure" account for the construction of a new air base in Crotone, Italy. The prohibition is identical to the language included in last year's appropriation bill. The Committee has also reduced the "NATO infrastructure" account by an additional $60,000,000 to eliminate the funds which would be utilized to support construction at Crotone. The Committee notes that the Department and NATO have agreed to reduce the U.S. share of the cost of Crotone by 18 percent. However, the United States would still be required to provide an additional $150,000,000 over the next few years to complete base construction. It is the view of the Committee that financing for a new foreign air base should not be made available when dozens of domestic bases are being closed. The Committee believes that a minimum cost bare base capable of supporting periodically deployed aircraft would fulfill the U.S. commitment to NATO. Funds previously committed by NATO could provide sufficient facilities for such a bare base. The alternative developed by the Department would, instead, provide a full service air base with a total population of 6,500 Air Force personnel and dependents.

BASE CLOSURE ACCOUNTS

The bill includes $971,000,000 for the two base closure accounts; $297,000,000 supports the initiation of the 1991 round of base closures recommended by the Commission on Base Closures and Realignments and subsequently approved by the House of Representatives. The remaining amounts support base closures and realignments approved by Congress 2 years ago. The Committee is concerned with the dramatic economic impact base closures and realignments will have on many communities. Therefore, the Committee requires the Department to direct the military services to make vacated properties available for transfer to alternative use in the

most expeditious manner. Communities severely impacted by closed bases should be permitted the opportunity to initiate alternative economic development as soon as possible to mitigate the economic loss associated with base closures. The Committee has increased the budget request to provide substantial additional funds for environmental cleanup at closed sites. These additional funds should allow the reutilization process to be accelerated. The Committee also directs that no funds may be spent from the account titled "Base realignment and closure, part II" until the Committees on Appropriations have been provided with a 5-year budget plan and form 1391's for the fiscal year 1992 program. The Committee notes that the Department has only programmed $600,000,000 in the future year defense plan for the second round of base closures and realignments. The Commission on Base Closure and Realignments has reported one-time costs totaling $4,100,000,000 which will be required to implement closure and realignment decisions. The Committee is concerned that the Department has failed to adequately budget for the realistic costs of base closures. The Department should revise its planning requirements as soon as possible to give the Congress and the American people an accurate and honest estimate of the true costs as well as the potential savings associated with base closure decisions.

RESCISSION

The Committee approves the rescission of $189,792,000, the same as the House. The rescissions recommended in this bill include the following projects:

Military construction:	
Army 1990–94: Red River Army Depot, Texas: Central distribution center—phase III	$39,000,000
Subtotal	39,000,000
Navy 1989–93: Fleet Surveillance Support Command, Guam: Electronic installation	[1] 10,972,000
Navy 1991–95: Silverdale strategic weapons facility, Bangor, WA:	
Engineering services building	[1] 3,520,000
Magazine modifications	800,000
Missile assembly building	[1] 7,340,000
Motor inspection building	6,630,000
Radiographic inspection building	[1] 13,870,000
Training facility addition	[1] 9,740,000
Transfer facility addition	[1] 3,520,000
Subtotal	56,392,000
Air Force 1989–93: Elmendorf AFB, Alaska: OTH–B operations building	[1] 16,900,000
Air Force 1990–94: F.E. Warren AFB, Wyoming: Peacekeeper rail garrison, various projects	[1] 63,900,000

Air Force 1991-95:	
Various locations, Alaska: OTH-B nontechnical support facilities	[1] 11,000,000
Holloman AFB, New Mexico: Avionics facility (F-15 relocation/F-117 facilities, phase I)	2,600,000
Subtotal	94,400,000
Grand total	189,792,000

[1] Included in H. Doc. 102-50:

Military construction, Navy (rescission proposal No. R91-18)	$48,962,000
Military construction, Air Force (rescission proposal No. R91-19)	91,800,000
Total	140,762,000

OTHER ISSUES

Pentagon rehabilitation.—The Committee has deleted funds related to the rehabilitation of the Pentagon complex. The Committee notes that, beginning in fiscal year 1993, the Department proposes to provide for Pentagon rehabilitation construction through a new revolving fund under the jurisdiction of the Defense appropriation bill. The Committee believes that all projects requested for Pentagon rehabilitation and construction should be funded in one account. Therefore, the Committee has eliminated funding for those projects requested from the military construction appropriation for fiscal year 1992. These projects should be financed through the new revolving fund beginning in fiscal year 1993.

Korea and Japan.—The Committee continues two general provisions which prevent an increase in accompanied tours in Korea and prevents the use of appropriated funds to support the relocation of the U.S. 8th Army Headquarters. The Committee continues to insist that all relocation costs associated with the Yongsan complex must be the responsibility of the Government of South Korea. The Committee notes that an agreement has been reached with South Korea. The Committee has also eliminated all construction requested for Korea and Japan. The Department should seek host-nation funding for all construction requirements in these countries.

Planning and design.—The Committee has reduced the overall request for planning and design activities for the active services and defense agencies. The reductions reflect the Committee's view that future military construction activities must be moderated due to constraints on the budget.

Program, project, and activity.—For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119), the term "Program, project, and activity" will continue to be defined as the appropriation account.

Central America construction.—As in previous years, the Committee directs the Department to submit a 5-year construction plan for the Southern Command's area of operations by February 1, 1992. The report should also include a discussion of the options and costs being considered for the relocation of the Southern Command from Panama. In addition, the report should include all construction-related activities in South America including construction associated with antidrug activities. As in previous years, the report should reflect construction expenditures from all DOD accounts. In

the February report the Department is also directed to include a complete compilation of all construction from any source since 1981, including construction undertaken during exercises, which may have been undertaken in Honduras, El Salvador, Çosta Rica, or Panama. The report should detail each project, its cost, and justification. The report should also detail if the projects are still being utilized by either U.S. forces or the host nations, either on a full time or a sporadic basis. The report should also detail future proposed uses of the facilities. In addition, the report should outline each instance that military equipment of any type has been excessed or otherwise left in the host countries following military exercises.

MILITARY CONSTRUCTION, ARMY

Fiscal year 1991 (including rescission)	$629,392,000
Budget estimate, 1992	870,170,000
House allowance (including rescission)	838,585,000
Committee recommendation	798,770,000
Rescission	39,000,000
Net	759,770,000

The Committee is recommending $759,770,000 including a rescission, for the Army for fiscal year 1992. This is a decrease of $110,400,000 from the budget request. (See State table at the end of the report for complete program recommendations.)

Kwajalein, various projects.—The Army seeks the initiation of a multiyear project to upgrade facilities at the remote Pacific location, Kwajalein. The Committee has provided more than $50,000,000 to initiate the effort in fiscal year 1992, a reduction of $25,000,000 from the budget request. The Army is directed to absorb the reduction by scheduling work previously planned in fiscal year 1992 in future years.

Red River, TX.—The Committee agrees with House action and has recommended transfer of $39,000,000 previously appropriated to the Army for the Red River Army Depot, TX, to the Defense Logistics Agency [DLA]. This action is taken since the DLA will take over the supply mission at the depot. The action is being accomplished by rescinding $39,000,000 under the Department of the Army and appropriating $39,000,000 under "Military construction, Defense Agencies."

Fort Polk, LA, master plan.—The Committee directs the Army to submit a 5-year master plan for facility construction and modernization of Fort Polk, LA. The master plan should take into consideration the new missions being transferred to Fort Polk and the backfilling of troops being restationed from Europe. No funds previously appropriated or included in this bill for construction at Fort Polk may be utilized for any other purpose until the master plan has been submitted and approved by the Committee.

Chemical demilitarization, various locations.—The Committee has provided funds, requested in the budget, for destruction facilities for the existing stockpile of chemical weapons. The Committee agrees with the House, and directs that none of the funds provided may be obligated until operational verification testing phase IV at the Johnston Island facility has been completed and designs have been verified. The Department is directed to provide the Committee with a report when Johnston Island testing has been completed. The report should indicate the design changes to be incorporated in facilities which will be built inside the United States.

Fort Wainwright, AK.—The Congress provided $8,300,000 in fiscal year 1991 to construct a new elementary school for military

dependents at Fort Wainwright, AK. Following completion of design and cost estimating, the Committee understands that an additional $3,300,000 is necessary to fully fund construction of the school. The Committee expects the Army to reprogram available funds from within the 1991 appropriation for military construction, Army, to meet the additional identified costs for this project. Such additional funds should be made available concurrent with the remainder of the 1991 appropriation for the school to the authority responsible for project construction.

Yakima Firing Range, WA.—The Committee has concerns about the overall justification for the expansion of the Yakima firing range. The $19,000,000 requested for the expansion is therefore denied until the Army provides in writing to the Congress a satisfactory and full evaluation of the rationale and need for land acquisitions as a mechanism for improving key training deficiencies; the rationale and need for access to river crossings based on these deficiencies; and the specific benefits of the proposed Yakima expansion to Army preparedness.

Fort Bragg, NC, access road.—The Committee agrees with the House and directs the Army to expedite design of an access road extension at Fort Bragg, NC. The on-base access road is necessary to facilitate the construction of the $250,000,000 replacement medical center and to support access to medical services. The Committee directs the Department to include funding for the access road in the fiscal year 1993 amended budget request.

Fort Richardson, AK.—The Committee recommends $7,000,000 to renovate the existing indoor physical fitness facility. This building, constructed in 1951, is inadequate to meet the indoor training requirements for military personnel stationed at Fort Richardson, AK.

Planning and design.—Within the amounts approved for Army planning and design activities, the Committee has added $1,500,000 for design of an administrative and support complex at Fort Polk, LA. The Committee also directs that the Department include construction funds for this project in the amended fiscal year 1993 budget request.

MILITARY CONSTRUCTION, NAVY

Fiscal year 1991 (including rescission)	$1,126,406,000
Budget estimate, 1992	879,420,000
House allowance (including rescission)	792,037,000
Committee recommendation	878,211,000
Rescission	56,392,000
Net	821,819,000

The Committee is recommending $821,819,000 including a rescission, for Navy and Marine Corps military construction projects in fiscal year 1992. This amount is a decrease of $57,601,000 from the budget request. (See State table at the end of the report for complete program recommendations.)

Earle Naval Weapons Station, NJ.—The Committee has provided $36,500,000 as requested in the budget for construction of a new trestle at Earle Naval Weapons Station, NJ. The House deleted all funding for this project. The Committee notes that NATO will fund

50 percent of the total construction cost for this project. The Committee believes this type of burden sharing should be encouraged with NATO. Therefore the funding has been provided.

Adak Naval Air Station, AK.—The Committee requests the Navy to conduct a comprehensive review of the condition and availability of housing at Adak Naval Air Station, AK. The Committee is concerned that housing on Adak may not adequately meet the needs of military personnel and their families assigned to Adak, and expects the Navy to specifically assess the condition of the housing stock in light of DOD standards for space for families, age of facilities, adequacy of appliances and interior condition and recreational facilities. This review should include recommendations to respond to any deficiencies identified at Adak, and should be provided to the Committee not later than March 15, 1992. The Committee intends to review the housing situation at Adak during hearings on the Navy's 1993 Military Construction budget request.

Lakehurst NAEC, NJ.—From funds available to the Navy for planning and design in fiscal year 1992, the Navy should immediately design a potable water system needed at Lakehurst Naval Air Engineering Center, NJ.

Planning and design.—The Committee has included $4,500,000 under Navy planning and design for initiation of design of an anechoic chamber at Patuxent River Naval Air Station, MD. The Committee directs the Navy to provide a report before February 1, 1992, outlining a specific schedule for construction of this project.

Military Construction, Air Force

Fiscal year 1991 (including rescission)	$897,704,000
Budget estimate, 1992	1,108,040,000
House allowance (including rescission)	1,035,020,000
Committee recommendation	924,590,000
Rescission	94,400,000
Net	830,190,000

The Committee recommends $830,190,000 including a rescission, for the Air Force in fiscal year 1992. This is a decrease of $277,850,000 from the budget request. (See State table at the end of the report for complete program recommendations.)

B-2 facilities.—The Committee has provided no funds for construction of facilities to house the B-2 at Whiteman AFB, MO, in accordance with the action by the Senate Armed Services Committee. The Committee will review the appropriate level of funding once action has been completed by the House-Senate conferees on the National Defense Authorization Act.

Andrews Air Force Base, MD.—The Committee has not provided $2,700,000 to replace the roof at a communication center at Andrews Air Force Base due to lack of authorization. However, the Committee believes this project is meritorious and will review funding in conference with the House of Representatives.

Eielson Air Force Base, AK.—The Committee recommends $4,500,000 to replace the existing range support facility at Eielson Air Force Base, AK, which was damaged by unusually heavy snowfall earlier this year. This replacement facility will be configured to accommodate the expanded range facilities for the Pacific Air

Forces, necessitated by the closure of the Crow Valley air-to-ground training range in the Philippines.

Goodfellow Air Force Base, TX.—The Committee is aware of the need for a new physical fitness center at Goodfellow AFB in San Angelo, TX. The existing facilities are 50 years old and past the point of economical repair. They were designed to support a base population of 2,000 while the population at Goodfellow will rise to 4,800 over the next 2 to 3 years. There are inadequate locker and shower facilities for female personnel, structural columns adjacent to the main recreation area pose a safety hazard, and the weight and racquetball areas are not large enough to support even current needs. Owing to the large number of young trainees present at Goodfellow, and their need to maintain a high level of fitness, the Committee directs the Air Force to begin design immediately (use of a standard design should be considered to expedite the process) and include the project in the amended fiscal year 1993 military construction budget request.

Planning and design.—Within the amounts provided for Air Force planning and design, the Committee has added $7,000,000 for a classified program recently transferred to the Air Force from the Strategic Defense Initiative Organization.

Military Construction, Defense Agencies

Fiscal year 1991 (including rescission)	$523,169,000
Budget estimate, 1992	725,700,000
House allowance	745,990,000
Committee recommendation	654,330,000

The Committee recommends $654,330,000 for projects considered within the "Defense agencies" account. The amount recommended is a decrease of $71,370,000 from the budget request. (See State table at the end of the report for complete program recommendations.)

Nellis AFB, NV.—The Committee directs that for fiscal year 1992, the Secretary of Defense shall continue to provide the Army Corps of Engineers the authority and funding, as provided by the Military Construction Authorization and Appropriation Acts for fiscal year 1991, to continue with the construction of the composite medical replacement facility at Nellis AFB, NV, and that no action be taken to downsize the hospital.

Fort Bragg, NC, hospital replacement.—The Committee strongly supports the proposed $250,000,000 project for a replacement medical center at Fort Bragg, NC. Accordingly, the Committee has approved initial funding totaling $15,000,000 for this project as requested by the Department under the "Base realignment and closure" account, part I. An additional $11,000,000 will be requested by the Department from this account in fiscal year 1993. These funds support the additional health care personnel being assigned to Womack Army Medical Center due to the closure of Letterman Army Medical Center. In addition, the Committee directs the Department to request the remaining amounts necessary to complete the replacement project in the "Defense agencies" account beginning in the fiscal year 1993 amended budget request.

Elmendorf Air Force Base Hospital, AK, replacement program.—The Congress approved funding during 1990 to commence the design and engineering effort to replace the existing hospital at Elmendorf Air Force Base, AK. The eruption of Mount Pinatubo in the Philippines, and the decision to close Clark Air Force Base and the regional medical center located at Clark has increased the urgency to proceed with this project. The Elmendorf Air Force Base Hospital has been designated the regional medical center for the Pacific Air Force, and serves an expanded beneficiary population in the 11th Air Force. The Committee expects the Department to proceed expeditiously to complete design and begin construction of this facility as quickly as possible. The Committee expects the fiscal year 1993 amended budget submission for the Department to include full funding for the Elmendorf Air Force Base regional medical center. The Assistant Secretary of Defense (Health Affairs) shall provide the Committee with a schedule for the completion of design and engineering work, and an accelerated construction plan for this facility not later than February 15, 1992. The Committee will consider this report and the status of this project during hearings on the Department's fiscal year 1993 budget request, and considers this project an item of special interest.

Special Operations Command.—Events in the past year have shown the need for a modest level of minor construction funds and contingency construction funds for the special operations community. The Committee has added $6,000,000 in the minor construction account specifically for the U.S. Special Operations Command. Within the amounts provided for minor construction, Special Operations Command, the Joint Special Operations Command is directed to proceed with a classified airport improvement project at a classified location. The Committee also added $5,000,000 in the Department's section 2804 contingency construction account to allow flexibility for the urgent, unforeseen requirements of the command. The Department is expected to provide the Committee with notification under the current procedure whenever these funds are utilized. The Department should adjust the annual appropriations request to include adequate funding levels in future fiscal years for both accounts.

Defense medical facilities.—The Committee recognizes the significant contributions and critical importance of the Walter Reed Army Institute of Research [WRAIR] to the Department's medical research program and to public health in general. The Committee is aware that current facilities housing the WRAIR are in such a state of disrepair as to be unsafe and hazardous to the health of the scientists and employees of the Institute. The Committee is concerned that funding for construction of a new building for the WRAIR was not included in the 1992 budget request. Therefore, the Committee has provided $5,000,000 for completion of planning and design for a new facility. The Defense Medical Facilities Office is directed to utilize $5,000,000 of the $30,000,000 provided by the Committee to accomplish the design and is further directed to include a request for construction in the amended fiscal year 1993 budget request.

The Committee is also aware of serious structural deficiencies of building 54 which houses the Armed Forces Institute of Pathology

[AFIP] at Walter Reed. The Committee has added an additional $1,000,000 for planning for a new facility to house the AFIP. The Department is directed to work with the National Institutes of Health, the Uniformed Services University, the National Naval Medical Center, and other appropriate Government agencies to assess the potential for the development of joint ventures and joint organizational structures to address the AFIP's facility problems.

The Committee has deferred $22,000,000 for a fleet hospital prepositioning facility proposed for Stockton Naval Communications Station. The Navy is directed to validate the requirement in light of changing world security circumstances.

National Security Agency.—The Committee understands that of the remaining surplus land at Fort George G. Meade, MD, is the Tipton Army Airfield. Because of the airfield's very close proximity to the headquarters of the National Security Agency [NSA], additional use or development of the airfield may pose a threat to NSA's operations. The Committee directs NSA to study this issue and submit a report no later than May 1, 1992, on the probable impact of establishing a general aviation airport or allowing non-Federal operation of the airfield. The Department of Defense is directed not to proceed with disposition of the airfield until this report has been received and reviewed by the Committees on Appropriations.

Overseas classified.—The Committee has denied $10,400,000 for a rapid deployment medical facility warehouse. No base access agreement exists for this facility.

NATO Infrastructure

Fiscal year 1991	$192,700,000
Budget estimate, 1992	358,800,000
House allowance	158,800,000
Committee recommendation	254,400,000

The Committee recommendation of $254,400,000 for the "NATO infrastructure" account is $104,400,000 below the budget request. This appropriation provides the U.S. share of commonly funded NATO infrastructure in Europe and the United States. A discussion of NATO infrastructure, overseas bases and Crotone Air Base is included at the beginning of the report under "Items of special interest."

The Committee has deleted $60,000,000 from the authorized amount for NATO infrastructure reflecting the Committee's legislative provision restricting United States participation in the construction of a new air base at Crotone, Italy.

Military Construction, Guard and Reserve Components

Fiscal year 1991	$690,117,000
Budget estimate, 1992	281,400,000
House allowance	470,531,000
Committee recommendation	662,703,000

The Committee recommends $662,703,000 for military construction projects for the Guard and Reserve components. This amount is $381,303,000 above the budget request and reflects the Committee's strong support for the most cost-effective component of the

Department of Defense. A discussion of this account is included at the beginning of the report under "Items of special interest." (See State table at the end of the report for complete program recommendations.)

Individual component recommendations are as follows:

Component	Committee recommendation
Army National Guard	$233,274,000
Air National Guard	231,506,000
Army Reserve	114,723,000
Navy Reserve	60,400,000
Air Force Reserve	22,800,000

Deficiency allowance.—The Committee has provided deficiency allowances to allow sufficient room for House-Senate conference committee consideration of projects pending authorization in the National Defense Authorization Act for Fiscal Year 1992.

Reistertown, MD.—The National Guard Bureau is encouraged to consider the Montrose Military Reservation in Reistertown, MD, as the site for a Regional Inter-Agency Counternarcotics Institute. Reistertown is centrally located in the mid-Atlantic region and is easily accessible off Route 95. This site is already the home of the Maryland Military Academy and, as such, has classrooms and other support facilities that could be shared with the Counternarcotics Institute.

Reprogramming allowances.—The Committee has provided $1,382,000 as a reprogramming allowance for the Army Reserve and directs that these funds be applied to previously appropriated reserve center projects at Morgantown, WV, and Rainelle, WV. The Committee has also provided $306,000 as a reprogramming allowance for the Air National Guard and directs that these funds be applied to a previously appropriated land acquisition at Yeager Airport, Charleston, WV. These reprogrammings are approved to provide full funding for the current working estimates for these projects.

Salt Lake City, UT, ANG Base.—The Committee is aware that the base engineering complex at the Salt Lake City, UT, Air National Guard Base is in need of relocation due to existing safety deficiencies. Therefore, the Committee directs the Department to include construction funding for a new engineer complex in the fiscal year 1993 amended budget request.

Camp Dodge, IA.—The Committee directs the Department of Defense to accelerate the process of acquisition of a 1,469-acre tract of land adjacent to Camp Dodge, IA, for which funds were provided in fiscal year 1990.

Eielson Air Force Base, AK.—The Committee recommends $4,600,000 to construct a new squadron operations facility for the 196th Air Refueling Squadron. Existing facilities are inadequate for the expanded unit, and the new operations building will provide an adequate secure environment for mission planning and command and control.

Kulis Air National Guard Base, AK.—The Committee recommends $400,000 for an addition and alteration to the existing fire station at the base. The establishment of the 210th Air Rescue

Squadron at Kulis, AK, necessitates expanded emergency support facilities at Kulis Air National Guard Base.

Camp Dawson, WV.—The Committee directs the Department of Defense to accelerate the process of acquisition of a 490-acre tract of land adjacent to Camp Dawson, WV, for which funds were provided in fiscal year 1990.

Camp Mabry, TX.—The House included $500,000 for a headquarters building at Camp Mabry, TX. The Committee endorses the House position; however, because the project was not authorized in the Senate-passed National Defense Authorization Act, the Committee could not provide funding. The Committee will look favorably on the project during conference committee action if, as expected, the facility is authorized. The Committee is aware that a cost increase of $270,000 to the initial budget request has been justified by the Air National Guard. The Committee supports full funding of the project at $770,000.

C–23 training facilities.—The Committee has been advised that the Department of the Army plans to consolidate C–23 training at Clarksburg, WV, and has included sufficient funds to design the necessary training facility. The Committee also believes that the Department of the Army should investigate the feasibility of leasing space at the planned Mid-Atlantic Aviation and Training Center to be located at Clarksburg.

Libby Army Airfield, AZ.—The Committee is aware of the urgent need for substantive reconstruction of the runway at Libby Army Airfield. Repairs to the runway are made on a regular basis from operation and maintenance funds. Additional funds from the National Guard Bureau will be necessary to continue training and other operations at the runway. The runway was threatened with a temporary shutdown of all flying operations last year because repair funds had been depleted. Additionally, some aircraft are also restricted from using the runway for certain operations because of their weight and the danger the runway poses to their safety. The Committee strongly supports the appropriation of $10,000,000 to begin reconstruction work on the runway upon completion of engineering construction plans. The House-Senate conferees will review the need to proceed with this required project.

Professional Military Education Center, TN.—In fiscal year 1988, the Air National Guard began a program to expand and upgrade the Professional Military Education Center [PMEC] complex at McGhee Tyson Airport in Knoxville, TN. Expanded Air Guard missions have led to a 40-percent increase in students. The Committee has supported the modernization effort. However, the Committee is concerned the Department has failed to expeditiously program all facilities identified in the master plan. Therefore, the Department is directed to include $2,400,000 in the amended fiscal year 1993 budget request for the PMEC's administrative support facility.

FAMILY HOUSING OVERVIEW

The Committee has provided $3,458,933,000 for family housing construction and operations and maintenance.

Family housing, Hawaii.—The Committee is very concerned with the grave situation facing military families stationed on the island

of Oahu, HI. Currently, there is a deficit of over 6,000 military family housing units. Military families are placed on long waiting lists for Government-owned quarters, often waiting 2 years. During the waiting period military families must seek housing on the local economy, where there is also a severe shortage of adequate, affordable housing. The island of Oahu has experienced large escalation in rental rates, making much of the available rental housing beyond the affordable limit of military personnel. To rent quarters on the local economy, families must expend 40 to 55 percent of their total monthly household income. As a result, many simply cannot afford to live without additional assistance. Today the families of junior enlisted personnel of all military services comprise the most numerous user group of food stamps on Oahu.

The Committee believes that lack of affordable housing seriously undermines the military's ability to perform its vital Pacific mission. The rising cost and reduced availability of rentals and the exorbitant costs to purchase homes in the private sector causes financial hardships and family stress for many of our enlisted personnel. The results affect the quality of life of our military families, servicemember retention, and the mission effectiveness and capabilities of the forces supporting the Commander-in-Chief, Pacific.

The Committee believes these factors make the case for additional military housing in Hawaii unique and compelling. The Committee believes that the military services must place a greater priority on addressing the housing and associated quality of life issues facing military personnel in Oahu. Therefore, the Committee directs the Department of Defense to submit a multiyear housing development plan for Oahu, HI, with its amended fiscal year 1993 budget submission. The Committee further directs that the amended fiscal year 1993 budget request include a significant increment of construction to substantially reduce the large deficit.

Operations and maintenance.—The Committee has made substantial reductions in the request for operations and maintenance of military family housing. The Committee has provided an increase of 5 percent over fiscal year 1991 for most accounts, unless a smaller amount was requested by the administration. The Committee believes a 5-percent increase provides adequate funds for fiscal year 1992. The military services are expected to absorb the reductions from the budget request through more efficient operations.

Contract cleaning.—The Committee has included a general provision also approved by the House limiting contract cleaning of family housing quarters to $15,000,000. This is a reduction of $1,000,000 from fiscal year 1991. The Committee directs that contract cleaning shall be performed only at locations outside the continental United States where savings can be documented by reduced requirements for temporary lodging allowances.

General officers quarters.—The Committee agrees with House report language concerning reporting requirements for general and flag officer quarters and directs that no funds in this bill may be utilized to support general and flag officer housing construction which exceeds the statutory limitations specified in title 10, United States Code, section 2826.

FAMILY HOUSING, ARMY

Fiscal year 1991 (including rescission)	$1,525,353,000
Budget estimate, 1992	1,534,300,000
House allowance	1,579,120,000
Committee recommendation	1,508,850,000

The Committee recommends $1,508,850,000 for family housing, Army in fiscal year 1992. This is a decrease of $25,450,000 from the budget request. Specific details are included in the tables at the end of the report.

FAMILY HOUSING, NAVY

Fiscal year 1991 (including rescission)	$854,981,000
Budget estimate, 1992	879,900,000
House allowance	908,140,000
Committee recommendation	860,900,000

The Committee recommends $860,900,000 for family housing, Navy in fiscal year 1992. This amount is $19,000,000 below the budget request. Specific details are included in the tables at the end of the report.

Fallon NAS, NV.—The Navy is directed to determine the amount of unmet family housing needs at Fallon NAS and to initiate design of such housing. The Navy is also directed to include construction funds for such a project in the amended request for fiscal year 1993. The Navy is further directed to program funding in the military construction account for bachelor enlisted quarters in the military construction request for fiscal year 1994.

NAS Whidbey Island, WA.—The Committee is aware of, and concerned with, the serious military family housing shortage at Naval Air Station Whidbey Island, WA. Junior enlisted personnel are on waiting lists for up to 17 months before they are assigned to quarters. The Committee is further aware that because of the recent worldwide basing studies that Whidbey Island's proposed 801 (build/lease) family housing project was deferred. In light of final action on basing which keeps Whidbey Island as a major Navy base, the Committee directs the Department of the Navy to program for family housing units at this location. The Committee understands that 801 housing programs may not be viable in the future due to recent budget scoring issues. If 801 housing cannot be programmed for Whidbey Island, the Navy should include a request for new family housing construction at this location in the next available budget cycle.

FAMILY HOUSING, AIR FORCE

Fiscal year 1991 (including rescission)	$888,435,000
Budget estimate, 1992	1,081,500,000
House allowance	1,085,983,000
Committee recommendation	978,983,000

The Committee recommends $978,983,000 for family housing, Air Force in fiscal year 1992 which is $102,517,000 below the budget request. Specific details are included in the tables at the end of the report.

Construction improvements.—The Committee has provided the Air Force $131,236,000 for family housing improvements, a reduc-

tion of $10,000,000 from the budget request. The amount provided, however, is more than the combined improvements allowance for the Army and Navy. The Air Force is directed to take the reduction from improvements at overseas bases.

Family Housing, Defense Agencies

Fiscal year 1991 (including rescission)	$20,714,000
Budget estimate, 1992	26,200,000
House allowance	26,200,000
Committee recommendation	26,200,000

The Committee recommends $26,200,000 for family housing, defense agencies in fiscal year 1992. This amount is the same as the budget request. Specific details are included in the tables at the end of the report.

DIA family housing leasing activity.—The Committee has reviewed the requirement for the Defense Intelligence Agency to provide reports regarding lease costs for family housing at high cost posts. The Department of State has recently completed a new interagency housing policy and standards that in effect standardizes all housing assignments at U.S. Embassies. By tightening the standards for housing overseas the need for specific reports on each individual lease has diminished. Effective January 1, 1992, the Committee suspends the current requirement which provides for a separate report on each individual lease. Currently more than 150 lease agreements are reviewed by the Committee each year. Such reports consume tremendous manpower and administrative activity for both the Congress and the DIA. In lieu of the current reporting requirement, the Committee directs the DIA to provide a report to the Committee by January 15, 1992, which outlines the current maximum at each overseas location. DIA is further required to provide the Committee with an updated report every 6 months outlining approved changes to the current maximum rent cap. In addition, the DIA must provide the Committee with a 21-day notification for any lease which is to exceed a maximum rent as stated in the most current semiannual report.

Homeowners Assistance Fund

Fiscal year 1991	$5,100,000
Budget estimate, 1992	84,000,000
House allowance	84,000,000
Committee recommendation	84,000,000

The Committee recommends $84,000,000 to be appropriated for the homeowners assistance fund [HAP], the same as the budget request. This represents a substantial increase over the amounts requested in previous years due to base closures and realignments of military installations.

This program benefits military personnel and Federal civilian employee homeowners in locations where the housing market becomes depressed due to an announcement of a base closure or realignment of a military installation. The HAP provides partial compensation to homeowners for their financial losses incurred in the sale of their homes.

The Army is the executive agent for administration of the program. The Committee is aware the Army is making a number of administrative changes to improve the execution and cost effectiveness of the program. The Army is commended for this initiative and is directed to provide the Committee, prior to hearings on the fiscal year 1993 budget request, with a report on what changes have been made and projected results and cost savings.

Base Realignment and Closure Account, Part I

Fiscal year 1991	$998,100,000
Budget estimate, 1992	633,600,000
House allowance	658,600,000
Committee recommendation	674,600,000

The Committee recommends $674,600,000 for the "Base realignment and closure account, part I." A discussion of this account is included at the beginning of the report under "Items of special interest."

The Committee believes that the Department needs to place greater emphasis on environmental cleanup in order to facilitate expedited reutilization of land and facilities at closed bases. The Committee has included the full amount authorized for this purpose. The Committee agrees with the House and has reduced the spending cap for part I base closures and realignments from $2,400,000,000 to $1,800,000,000, to reflect revised estimates of costs.

Base Realignment and Closure Account, Part II

Fiscal year 1991	.....
Budget estimate, 1992	$100,000,000
House allowance	100,000,000
Committee recommendation	297,000,000

The Committee recommends $297,000,000 for the "Base realignment and closure account, part II." The Committee believes that the Department needs to place greater emphasis on environmental cleanup in order to facilitate expedited reutilization of land and facilities at closed bases. The Committee has included the full amount authorized for this purpose. A discussion of this account is included at the beginning of the report under "Items of special interest."

GENERAL PROVISIONS

The Committee has made no changes to sections 101–116 and sections 118–126 as recommended by the House. Other changes are as follows:

Section 117. The Committee believes that Korea should continue to increase its share of the common defense burden. Therefore, this provision has been amended to add Korea to the reporting requirement. The provision now reads as follows:

> *SEC. 117. The Secretary of Defense is to provide the Committees on Appropriations of the Senate and the House of Representatives with a report by February 15, 1992, containing details of the specific actions proposed to be taken by the Department of Defense during fiscal year 1992 to encourage other member nations of the North Atlantic Treaty Organization and Japan and Korea to assume a greater share of the common defense burden of such nations and the United States.*

COMMITTEE RECOMMENDED PROVISIONS

The Committee has added no new general provisions to the House-passed bill.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

Projects for which appropriations are specifically provided by the Committee are included in the Senate version of the authorization bill. The National Defense Authorization Act for Fiscal Year 1992 is pending in House-Senate conference committee. The Committee has approved deficiency allowances in certain accounts to permit consideration of projects expected to be approved during the authorization conference process.

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and

of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

No change in existing statutes has been proposed.
